Re: Local Law #4 of 2002

WAYS & MEANS

Dear Mr. Chairman,

In 1976, the New York State Legislature enacted an Item Pricing Law to provide consumers with accurate pricing information. Item pricing is defined as affixing or marking the price, by an authorized person, to a consumer item.

During the 1970s technological advances outpaced manual item pricing with the introduction of laser scanning of Universal Product Code (UPC) codes, removing the need for cashiers to enter a price marked on the product. The State Legislature feared that without laser scanner legislation, retailers would discontinue use of item pricing altogether once laser scanning was in place. Various extensions of the Item Pricing Law occurred, but in 1991, the State Item Pricing Law expired.

Following the expiration of the State Item Pricing Law in 1991, various municipalities, including Oneida County, sought to enact a *local* item pricing law. The State Consumer Protection Board assisted in drafting model legislation for municipalities.

In 1999, Oneida County passed a local law to require item pricing on individual items of food and food products offered for sale at retail food stores in Oneida County and to permit continued testing and development of the UPC checkout system. A few years later, Oneida County passed another local law adding a non-refundable processing fee to cover the cost of conducting a scanner accuracy certification inspection of \$500 for those stores using a computer assisted checkout system which would otherwise be required to item price. Subsequent amendments have been made to the county's item pricing law, the most recent being 2002 (Local Law 4 of 2002).

In the meantime, the State introduced a Scanner Accuracy law that has since been enacted as New York State Agriculture and Markets, Section 197-b. Counties have the option to follow this law or their local law, so long as the local law was passed prior to the creation of the new State law.

Research and analysis was conducted here at the county, followed by a series of meetings with the County Attorney's Office, the County Executive's staff and members of the County Department of Weights and Measures to review our local law. We used this analysis to make an informed decision whether to maintain our local law, amend our local law, or to dissolve our local law and instead, adhere to the State Law. It is important that our local law meets the needs of the county, protects consumers, and is

13.

comprehensible and fair for applicable businesses, i.e. retail stores. We did not want to simply adopt the State Law as this would usurp our local control and prevent us from making any edits in the future.

Our analysis found that our law is selective in enforcing item pricing/scanner accuracy, as it only regularly inspects just 11 retail stores (at approximately 20 locations as some stores under the local law have multiple locations in our county). Given the evolution of big convenience stores, far more businesses now fit the definition of retail store. As a result, we felt that implementing random checks on a wider range of retail stores, versus mandatory biannual checks on just 11, was more effective. Furthermore, modern scanners are overwhelmingly accurate. In fact, a recent industry study reported that scanners are overwhelmingly accurate with error rates less than 4%. By expanding the law to include additional businesses, we do not anticipate a significant increase in the error rate.

Lastly, we felt that the current practice of imposing a \$500 scanner accuracy certification annual fee on certain retail locations had no bearing on our true intent of aiding consumer awareness on pricing. Eliminating the fee takes away the notion of selective enforcement as a wider range of businesses will be inspected, without the necessity of paying a fee.

I am proposing the following amendments to the local law:

- Removing the \$500 annual fee
- Removing biannual checks, and allowing for random checks by expanding the definition of retail store
- Expanding the pool of businesses

For these reasons, I request for you to consider the amendments to Local Law 4 of 2002.

Sincerely,

Jim D'Onofrio

Cc: Oneida County Executive Anthony J. Picente, Jr.

INTRODUCED BY: Messrs. D'Onofrio, Porter
2ND BY:
LOCAL LAW INTRODUCTORY "F" OF 2016
LOCAL LAW NO. ____ OF 2016

**A LOCAL LAW AMENDING LOCAL LAW 4 OF 2002, PROVIDING FOR ACCURATE
PRICING OF GOODS OFFERED FOR SALE AT RETAIL IN ONEIDA COUNTY**

Legislative Intent: To require accurate shelf or item price marking on individual items of food and food products offered for retail sale in Oneida County and to permit continued testing and development of the universal product code checkout system without removal of item or shelf prices for consumer protection. In addition, to further encourage pricing accuracy and retail price competition while providing additional potential savings for consumers.

DECLARATION OF LEGISLATIVE FINDINGS

The Oneida County Board of Legislators hereby finds and declares that there is technology utilizing a laser scanning device offering numerous efficiencies and economies to the operation of the retail food industry, the use of which may make it economically advantageous for retail stores to remove price markings on individual grocery items. The Oneida County Board of Legislators further finds that price marking constitutes an indispensable ingredient to a consumer's right to all reasonable information in order to make an informed purchase choice.

Therefore, the Oneida County Board of Legislators declares that requiring accurate shelf or item price marking is necessary to protect the interest of the consuming public, and further declares that it is in the public interest to promote useful technology by permitting continued testing and development of the universal product code check out system without the removal of item or shelf prices.

15.

Furthermore, recognizing the consumer's rights to exercise freedom of choice in the marketplace, and wishing to provide consumers with the economies created when the latest technologies are employed in a competitive marketplace, regular and rigorous testing shall be undertaken to ensure stores are demonstrating the highest degree of accuracy in their computerized equipment; and therefore also in this alternate manner guaranteeing that consumers will be dealt with fairly in the marketplace and not be overcharged.
