WASTEWATER TREATMENT PLANT MAINTENANCE SUPERVISOR

DISTINGUISHING FEATURES OF THE CLASS: The incumbent in this position has immediate charge of the repair and maintenance of buildings, machinery and equipment at a wastewater treatment plant and its pumping stations. The duties involve responsibility for planning, supervising and participating in the repair and maintenance of buildings, machinery and equipment at the wastewater treatment plant and its pumping stations. Responsibilities for automotive equipment is not a part of this job. The incumbent works under general supervision of Wastewater Treatment Plant Maintenance Superintendent, who reviews general program objectives. The incumbent is allowed considerable latitude in deciding work methods. Supervision is exercised over the work of personnel. The incumbent performs related work as required.

TYPICAL WORK ACTIVITIES: (Illustrative Only)

Has responsible charge of the coordination and scheduling of routine maintenance and repair activities for the wastewater treatment plant and remote pumping stations, and pipeline pigging systems;
Supervises the personnel within the maintenance department;
Plans, oversees and participates in maintenance and repair jobs;
Establishes a comprehensive preventive maintenance schedule and ensures compliance;
Estimates the cost of labor and parts for repair/upgrade projects;
Has charge of the computerized asset management and inventory control system for parts and equipment;
Supervises the maintenance of the facility's instrumentation and controls systems, including security and SCADA systems;
Evaluates the complexity of repair jobs or upgrades and, in the case of major projects, recommends and works with outside contractors;
Assists in the procurement of service contracts for those systems that require specialty knowledge and expertise that are beyond the expected capabilities of the maintenance staff;
Assists in the preparation of annual budget.

FULL PERFORMANCE KNOWLEDGE, SKILLS, ABILITIES AND PERSONAL

CHARACTERISTICS: Thorough knowledge of plant operations, operation, maintenance and repair of pumps and auxiliary equipment; good knowledge of the uses and methods of repairing hydraulic and pneumatic equipment; good knowledge of the common practices, tools, terminology and safety precautions of the electrical/mechanical trades; general knowledge of mechanical trades; ability to read and work from plans, specifications and rough sketches; ability to plan, organize and supervise the work of others; ability to solve operating and maintenance problems as they occur.
