

# GUIDE TO POSTING NUMBERS\*

## HOUSE

Post the numbers on your house facing the roadway.

## MOBILE HOME

Post the numbers on your mobile home facing the roadway.

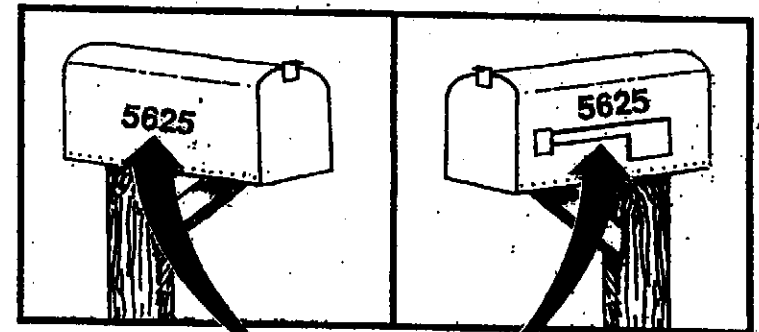

## PROPERTY / YARD

If the numbers are not clearly visible from the road on your house, mobile home, or mailbox, erect a "yard marker" with the numbers posted on it.

## BUSINESS

Post the numbers on your business facing the road.

## MAILBOX

Post *reflective* numbers on both sides of your roadside mailbox. *Be careful not to block the numbers with the mailbox flag.*

\* It is important to note that you may have to post numbers in several locations depending on your residence or business location, i.e. If you have property set back from the roadway, you should number your house or business, roadside box, and also place a yard marker. The key to numbering is that you want emergency services to be able to locate your property.

- Numbers must be:
- 3 - 4 inches in height
  - Numbers should be of a color that will show up readily.
