

SYSTEM-WIDE ANALYSIS FOR TRANSIT BASED TRANSPORTATION CONNECTIONS STUDY
FOR ONEIDA COUNTY, NY (SWA for TBTC)
RFP # 2018-239

FAQ 080318

- The following questions were submitted via e-mail, Friday, August 3, 2018:
 - Is fixed-route ridership data available at the route, trip, and stop level, or should we plan on collecting this data as part of the project effort?
 - In Section V of the RFP (Contents of Proposal, pages 21-22) – You have asked for the approach, work plan, and schedule to be divided by the principal firm, and subconsultant firms. This will lead to a disjointed approach in sections B and C of the response. Will you allow for us to combine the approach, work plan, and schedule for the principal and subconsultant firms, and allow that section to be at least 6 pages?

- Answers will be provided in FAQ 081018.
