

HIGHWAY MAINTENANCE SUPERVISOR

DISTINGUISHING FEATURES OF THE CLASS: The work involves responsibility for directing the road maintenance and reconstruction activities of the County Highway and Bridge System, and providing technical direction and field supervision to all road maintenance and construction activities. A major responsibility is for the coordination of maintenance and construction activities in widely separated geographic areas, and for liaison between engineering and office personnel and the field crews. Supervision is exercised over a large number of employees through subordinate supervisors, and work is reviewed through observation or through oral and written reports. The work is performed under the general supervision of the Deputy Commissioner of Highways and Bridges. Does related work as required.

TYPICAL WORK ACTIVITIES: (Illustrative Only)

Coordinates and supervises the activities of county highway crews and the use of materials and equipment in the maintenance of county roads and bridges;
Determines and schedules maintenance needs for various highway maintenance and reconstruction projects;
Assists in planning maintenance schedules and work loads;
Supervises snow removal and ice control activities on county roads;
Coordinates the use and distribution of equipment between the various maintenance projects;
Oversees and participates in new highway construction work;
Supervises and participates in the preparation and maintenance of activities, costs and progress reports and records;
Reports to and confers with the Deputy Commissioner of Highways and Bridges regarding equipment necessary for construction and maintenance projects;
Supervises the operation of the stockroom;
Administers the highway safety programs;
Oversees the highway radio communication systems;
Meets with the public and answers complaints regarding highway operations;
Operates various types of road construction and maintenance equipment as needed.

FULL PERFORMANCE KNOWLEDGE, SKILLS, ABILITIES AND PERSONAL

CHARACTERISTICS: Thorough knowledge of modern road reconstruction maintenance methods and procedures; thorough knowledge of equipment, materials, tools, terminology and safety precautions used in road and bridge maintenance, snow removal, and ice control; ability to read and understand sketches, blueprints and related road construction and maintenance plans; ability to solve operating problems as they occur in the field; ability to plan, organize and supervise the work of others; ability to secure the cooperation of others; ability to understand and carry out complex oral and written directions; ability to prepare and maintain activity costs and progress records and reports.

MINIMUM QUALIFICATIONS: Either:

- (A) Graduation from a regionally accredited or New York State registered two-year college with an Associate Degree in construction or engineering technology or a closely related field, **AND** four (4) years of experience in the construction and maintenance of paved highways and bridges; two years of which shall have been in a supervisory capacity; **OR**
- (B) Graduation from high school or possession of a high school equivalency diploma **AND** six (6) years of experience in reconstruction and maintenance of paved roads and bridges; two (2) years of which shall have been in a supervisory capacity; **OR**
- (C) Eight years of experience, as listed in (B) above; **OR**
- (D) An equivalent combination of training and experience, as defined by the limits of (A) through (C) above.

SPECIAL REQUIREMENT: Eligibility for a New York State Commercial Driver's License (CDL) at time of application. Possession of a valid Commercial Driver's License (CDL) at time of appointment and for duration of appointment.
